

ComicCraft – AI Comic Story Creator

Requirement Analysis Phase

Functional Requirements: Enter story prompt, character name, setting, tone, and art style; generate a five-panel outline, narration, dialogue, artwork, preview, and PDF.

Non-Functional Requirements: Simple interface, input validation, modular backend, protected API keys, demo mode, and deployment support.

Inputs: Story prompt, character name, setting, tone, and art style.

Outputs: Five comic panels, scene descriptions, narration, dialogue, images, and PDF.

Software Requirements: Python 3.x, Visual Studio Code, required packages, internet access for external AI services, and a modern browser.
