

ComicCraft – AI Comic Story Creator

Project Planning Phase

Stage 1 – Setup: Create project, Python environment, dependencies, and folder structure.

Stage 2 – Requirements: Create input form, request models, and backend routes.

Stage 3 – AI Integration: Integrate story, narration/dialogue, and image generation.

Stage 4 – UI Development: Create story form, comic preview, styling, and generation feedback.

Stage 5 – PDF Export: Combine panel images and text into a downloadable PDF.

Stage 6 – Testing: Test homepage, health endpoint, generation, validation, and PDF export.

Stage 7 – Documentation: Prepare report, testing documentation, user guide, and presentation.

Stage 8 – Demonstration: Demonstrate input, generation, preview, PDF export, GitHub repository, and live website.
