

ComicCraft – AI Comic Story Creator

Project Development Phase

Technology Stack: Python, FastAPI, Jinja2, HTML, CSS, JavaScript, Gemini AI, Hugging Face, Pillow, and FPDF2.

Project Structure: app/, static/, templates/, tests/, requirements.txt, .env.example, .gitignore, and README.md.

Development Process: The FastAPI backend accepts story information and coordinates AI services. Templates provide the web interface. Story content and panel artwork are combined into a comic layout and PDF.

Demo Mode: Demo mode allows the workflow to be tested without external AI API keys.

Security: API keys are stored in environment variables and must not be committed to a public GitHub repository.

Development Result: End-to-end workflow from story input to comic preview and PDF export.
