

ComicCraft – AI Comic Story Creator

Project Testing Phase

Testing Objective: Verify that the ComicCraft application and its main features work correctly.

TC01: Homepage loads successfully.

TC02: Health endpoint returns a status.

TC03: Valid story details start generation.

TC04: Demo mode produces five panels.

TC05: Panel images appear in the preview.

TC06: Narration and dialogue appear.

TC07: PDF export creates a PDF.

TC08: Empty required input produces validation feedback.

TC09: Application is accessible in a browser.

TC10: FastAPI server starts successfully.

Testing Types: Functional, input validation, API, UI, integration, and PDF export testing.
