

ComicCraft – AI Comic Story Creator

Project Demonstration Phase

Step 1: Introduce ComicCraft and the problem it solves.

Step 2: Open the ComicCraft web interface.

Step 3: Enter story prompt, character name, setting, tone, and art style.

Step 4: Start comic generation.

Step 5: Show the five-panel comic preview, narration, captions, and dialogue.

Step 6: Demonstrate PDF export.

Step 7: Explain FastAPI, HTML/CSS/JavaScript, AI services, and PDF generation.

Step 8: Show the public GitHub repository and, if deployed, the live website.

Final Outcome: Demonstrate the complete flow from story idea to generated comic and exported PDF.
